We live in the same world as you do.  
We see the same things; we face the same situations...  
But they make us think. They make us want to change.

And we believe in that change.

Abel foundation is a thought.  
A thought of peaceful existence, in harmony with nature,  
Of a beautiful life; of truth and love!  
And we want to spread it. To as many as we can reach.

We are a group of youngsters, but we try to understand the world.  
We know it's big and change is tough, but that only makes us more  
determined. We believe in little steps, and we believe in the power of  
an individual. And, yes, we believe in the goodness that lies within  
this world still.

Abel has begun with one of the most serious issues facing us today.  
Climate Change. And it has realistic solutions. Bringing in opinions  
about consumerism, eco-friendly lifestyles, zero-trash concepts,  
conservation, alternative resources and others, we wish to empower  
people with thoughts that will help them sustain. Especially, the  
generation to come!

While talking to children, it helps if innovative strategies are used to  
make young minds understand concepts and enjoy the process. The  
information could be diluted and mixed into activities, interactions  
and presentations. The outcome gives these children unique powers.  
Powers to save the planet we live on... the planet that is our only  
home.
